Our markets and geographies continue to be severely impacted by the global economic crisis. Trends visible in 4Q08 have continued throughout the first half of 2009. The weakness of the Russian rouble and other currencies in the region in which we operate against the US Dollar have added to the decline in our USD reported results

H1 Internet revenue performed better than print despite development issues. Belarus has performed exceptionally well with growth of 186.8% over 1H08. Print advertising revenues have been seriously impacted by the economic slowdown. Markets have contracted but indications are that TME brands are maintaining market share.
